

Our last quarter of 2022 was really challenging because we need to catch up on many schedules. Despite that our Team got sick and positive of Covid-19 after our Study tour last September, God was so gracious in giving us new strength to continue. We were grateful for the 29 participants who participated in the 2nd run of our training. We successfully facilitated this at Kampong Chhnang province.

Also, the challenges were also experienced by many of our project members. Many of them were affected by heavy rain and flooding. Their harvest failed and animals died. It was a difficult season for those community groups who are still in the process of renewing. Despite of this, the resiliency of the Khmer people was really amazing, their ability to withstand adversity and bounce back from difficult life events was amazing. Because they are not giving up, we will not also.

CHAD is CERTIFIED GRATEFUL for...

Successful 2nd run of Project Group Leaders Training for Capacity Building.

Safe travel and successful Project Visit and Coaching in 6 provinces.

Strength and Resiliency of our community partners after flood in their villages.

Successful hosting of GM and GMF Training and Commissioning held here in Cambodia

Improvements among 56% villages renewed and on process.

Good harvest of rice of our community partners in Kampong Speu province.

MEET RIN SARETH, PROJECT LEADER IN PREY AMPORN, BATTAMBANG.

Even though flooding affected her village during the early of 4th quarter of this year, she was still grateful. First, the timing, her daughter's engagement happened before the flood so she was able to use her chickens for food for their cultural engagement ceremony. Second, 50% of her chickens were used for the celebration. She raised 60 chickens and cooked 30 for the engagement ceremony which help him to provide worth \$150 to \$200 meal for the celebration. Why this is big deal? In Khmer culture, families of the bride and groom will really spend money for wedding engagements and ceremonies both in rural and urban areas. So for her, having the chicken raising of her own help her be ready when she needs it. Currently, she is raising 15 chickens and 50 chicks after the flood. She enjoyed this and looking forward to earned well next year.

CHAD TEAM SUCCESSFUL FOURTH QUARTER PROJECT VISIT

November
11 villages in 4 provinces

December
13 villages in 2 provinces
