

Whazzup...

Dear Friends,

It is quite some time since we last reconnect with each other. I felt guilty that I cannot sit down make a letter to greet you all.

Christmas has passed, New Year, Chinese New year and Valentines.....

The past year was not good, my daughter was diagnosed with cancer, then I was given this new job as the Country Mission Coordinator....besides being the treasurer. Though I have an idea what the scope of the work is, combining these 2 job make it a bit overwhelming. I was not able to apply for another compassionate leave to be with my daughter while she undergoes series of chemotherapy session. I was thinking, I will just take my time on my Christmas and New year's leave. And so in November my daughter was cleared of the cancer, and last January I accompanied my daughter on her last chemotherapy. God is so good.

- Helen Camarce #13953Z

For more information about our program
in Cambodia
please open our website....

1. Street Children Ministry - 14921A

2024 show growth and development for the program, their educational team continue to train volunteers from the community and improve their school's curriculum. They also teach Social Values and the children and their parents are both happy with the result. Increase in the enrollment is seen for 2025.

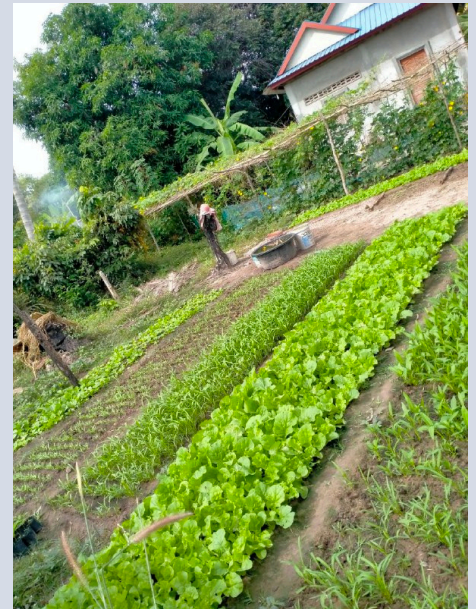

2. Women Livelihood and Empowerment - #3020788

We can see the improvement in each individual livelihood of the members. The two groups, continue their Group Savings Bank and their bank is growing and ready to give loan again to their members

.What is most important is that these women who used to play the role of just staying in the house taking

care of their babies and planting for their own consumption are now contributing to the earnings of the family and became more confident about themselves.

3. CHAD - Health and Community - 14916A

The CHAD program headed by Ms. Sok Sophal, a midwife in profession, coordinates with Provincial Health Centers/ Ministry of health for the continuation of our program with Health. The program involves giving access to clean water through Digging Deepwells in places where draught is imminent and distribution water filters.
