

COMMUNITY, HEALTH & AGRICULTURAL DEVELOPMENT CHAD NOTEBOOK

CLEAN WATER FROM FILTER AT CHANGCAR METHODIST CHURCH

We are so blessed to reach out to those who are in need of clean water sources because access to clean water is essential for sustaining life, promoting health, and ensuring the well-being of communities. Clean water prevents the spread of disease, supports proper hygiene and sanitation, and is vital for agriculture, industry, and environmental balance. We in CHAD aims to continue to ease the water insecurities all over cambodia

DENGUE FEVER CAMPAIGN

CHAD connected with the health center chief to conduct this campaign and covers everything that the participants needed like water and food. During this activity we had a total of 150 participants including the 50 adult people who joined and a 100 students. The said activity happened in a village wherein 2 children died because of dengue fever. Loosing precious lives because of the said sickness is alarming that is one of the reasons why we decided to conducted the campaign. During this campaign we make sure to clean the compound and trim grass around the area. We are so glad that the stake holders of the village cooperated with us throughout this activity.

DENGUE FEVER CAMPAIGN AT SVAY HC/ KAMPONG CHHNANG

CHAD SUPPORT DENGUE FEVER CAMPAIGN AT SVAY HC/ KAMPONG CHHNANG

WHY IS IT IMPORTANT?

1. Prevention Through Education
Educating communities about how dengue spreads primarily through mosquito bites empowers individuals to take proactive steps to prevent infection.
2. Reducing Disease Burden
Awareness campaigns help people recognize early symptoms such as high fever, severe headache, joint pain, and rash, prompting timely medical intervention.
3. Community Mobilization
Campaigns encourage community-wide participation in clean-up drives and mosquito control efforts.

RAIN WATER TRAINING

This activity was attended with 6 countries it happened last October 13-17, 2025. The participating countries are Philippines, Vietman, Cambodia, Myanmar, Loas, Mongolia.

CHAD ATTENDED RAINWATER ACADEMY TRAINING WITH 6 COUNTRIES AT HVS/ CAMBODIA

WHAT IS THIS ABOUT?

This training is about harvesting useful rain water and install rain water harvesting tanks. The WASH academy brought together church and community leaders to learn practical solutions for improving access to clean water. This also helps the people in the community to have access with clean water to be used in their daily life most especially hygiene.
